The digital society

# NATIONAL POLICY FRAMEWORK

## Digital Agenda 2020 for Estonia

*The public sector will treat different hardware and software platforms equally and ensure the interoperability of information systems by using **open standards**.*

*Use of **open standards and open specifications** will be enhanced with public sector leading the way.*

# Interoperability of the State Information System Framework

Lists open standards that should be used by public sector for its communication

Lists requirements to be taken into account when software is chosen by the public sector

# STANDARDISATION

Have started to use open standard process

Example:

[https://](https://e-gov.github.io/DHX/EN.html#13-v%C3%A4ljat%C3%B6%C3%B6tamine)

[e-gov.github.io/DHX/EN.html#13-v%C3%A4ljat%C3%B6%C3%B6tamine](https://e-gov.github.io/DHX/EN.html#13-v%C3%A4ljat%C3%B6%C3%B6tamine)

# SOFTWARE DEVELOPMENT

All the software we develop is open and free

Examples:

Open Electronic Identity - <https://github.com/open-eid>

X-road joint development with Finland -

<https://github.com/vrk-kpa/xroad-joint-development>

# EE PRES - 2017

PERMANENT REPRESENTATION  
OF ESTONIA TO THE EU

# Thank you!

Jaana Sahk-Labi
